

Colorado State Forest Service Urban and Community Forestry Success Story

Project Title: 2006 Greeley Tree Care Workshop

Project Emphasis: Public Education

Project Location: Greeley, Colorado

CSFS District: Fort Collins

Project Narrative:

The 2006 Greeley Winter Tree Care Workshop was held at Island Grove Park in Greeley on February 10, 2006. Over 150 people attended this year's event, the 17th year in a row. Fort Collins District Office staff of the Colorado State Forest Service (CSFS) and the Community Forestry Division of CSFS worked diligently with the City of Greeley Forestry Division to put together a great slate of speakers and topics.

Topics included a tree and shrub water use study conducted at Colorado State University, use of GIS systems in tree inventory management, wildlife and trees, and how to effectively manage a small landscaping/tree business with regard to annual taxation. Several exhibitors were also present. Even after 17 years, this event is well attended and as popular as ever!
