

Happy June from the Woodland Park Field Office!

Spring is finally here for most of us. As you start to think about the 2019 work plan, I want to share some resources with you.

Coloradoans now have an app to help identify trees, shrubs, and woody plants! The app is free and works offline! Link for [Android](#) users. Link for [iPhone](#) users. This app is great for identifying trees and shrubs. You can even save favorite species that are common on your property (or the ones you have a hard time remembering!).

The most updated Woodland Park Contractors and Consultants list is available on our website:

<https://csfs.colostate.edu/woodland-park/wp-forest-management-stewardship/>.

The CSFS website has listings of

forest products companies in the COWood program:

<http://cfp.csfs.colostate.edu/cfp-database-county.aspx?id=park#results>.

As always, our field office staff is available to mark trees and provide consultation/project management. The CSFS charges a standard rate of \$52 per hour for services. The rate covers administrative costs including personnel, vehicles and travel time to and from job/project sites. Materials are not included in the hourly rate.

Weeds are a perennial (☹️) problem with land management. For Teller and Park county residents, the Teller-Park Conservation District has management resources at: <http://www.tellerparkcd.org/noxious-weeds.html>

El Paso County Conservation District resources are found at: <https://www.epccd.org/contact> Custom grass seed mixes are also available at both locations.

We often have folks stopping in to our office looking to cut their own firewood. If you are interested in selling firewood permits let me know so I can put you in contact with them.

Remember, if you need to update your plan in 2019 don't wait! Consultant's schedules fill up quickly, and October will be here before you know!

Like and follow our [Facebook](#) and [Twitter](#) pages for the latest forest management information and links.

-Ashley

Woodland Park Field Office
Colorado State Forest Service
Office: 719.687.2951
csfs.colostate.edu

The mission of the Colorado State Forest Service is to achieve stewardship of Colorado's diverse forest environments for the benefit of present and future generations.
